Genesys Spine Apache™ PLIF System

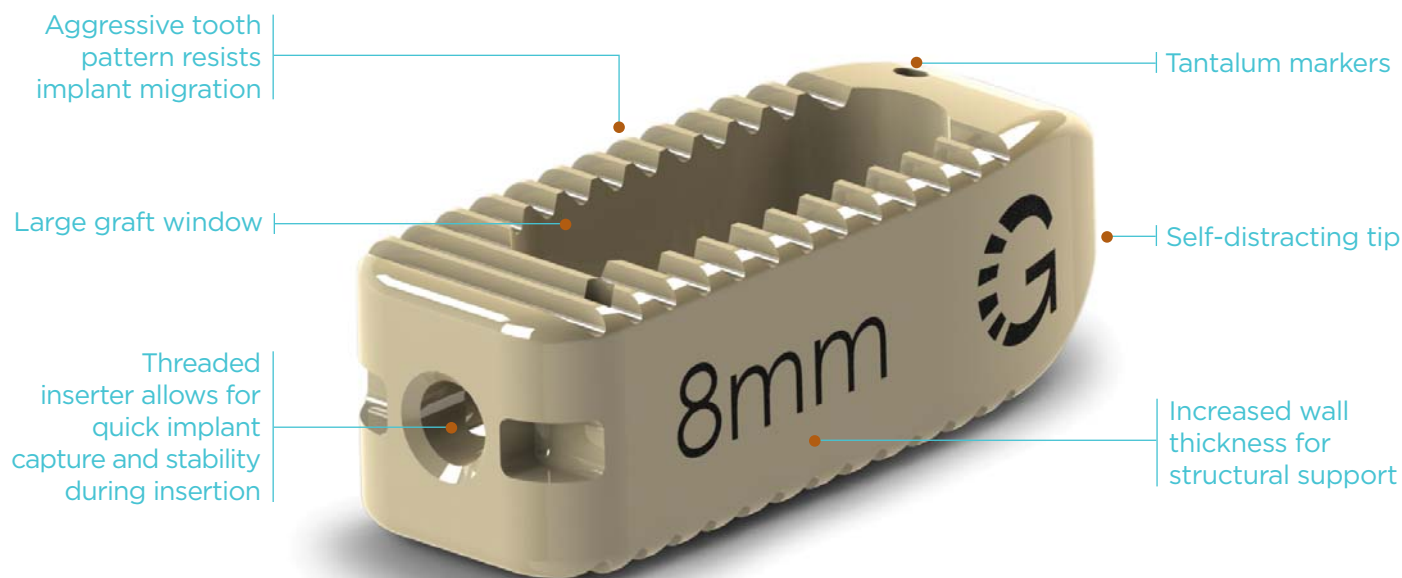

Genesys spine ®

1250 Capital of Texas Highway S.
Building 3, Suite 600
Austin, TX 78746

LC-010 REV C

The Genesys Spine Apache™ PLIF System consists of precision instruments and PEEK Optima® implants for aiding in fusion of the lumbar spine. The combination of PEEK Optima® and tantalum markers allows surgeons to have an enhanced view of implant placement during surgery and vertebral fusion post surgery.

Aggressive tooth pattern resists implant migration

Large graft window

Threaded inserter allows for quick implant capture and stability during insertion

Tantalum markers

Self-distracting tip

Increased wall thickness for structural support

8mm

HEIGHTS*

(*1mm increments)

6mm - 15mm

SPECIFICATIONS

Available in 25mm and 30mm lengths

9.35mm width

Available in Lordotic, Parallel, and Convex

Genesys spine®

*FDA approved for use as an IBFD and VBR
