

# BKS Total PSI

## Predictable Precision

Personalized planning and execution for greater surgical control and efficiency in and out of the operating room.

- Gain patient-specific insights through in-depth virtual visualization and assessment of patient anatomy.
- Execute precise knee implant positioning with MRI-based preoperative planning and 3D-printed guides.
- Accommodate surgeon alignment preferences and patient anatomy.
- Optimize surgical workflow with less instrumentation and no additional operating room footprint.
- Enable surgical plan reproducibility with accuracy and efficiency.
- Reduce costs and enhance surgical outcomes using broadly accessible enabling technology.

BKS Total PSI is compatible with Ortho Development's total knee arthroplasty systems BKS® and BKS TriMax®.
